SUMMARY

AWS Certified Developer Associate with 5+ years of experience in DevOps and cloud infrastructure, specializing in AWS services and Linux system management. Proven track record of setting up and optimizing CI/CD pipelines automating deployments for seamless scalability. Expertise in Python, Terraform, Gitlab and AWS.

EXPERIENCE

Cloud DevOps Engineer

Feb. 2024 – Present

Amalgam Technologies

Dallas, TX

- Migrated the Agreements service to AWS by provisioning S3 buckets and CloudFront distributions using Pulumi (TypeScript), enabling secure, high-performance content delivery and replacing legacy storage with scalable cloud infrastructure.
- Managed production releases via GitLab CI/CD, coordinating version tagging, changelog generation, and environment-specific deployments to ensure smooth, auditable, and reliable application rollouts.
- Automated virtual infrastructure operations by developing Python scripts for snapshot validation and storage lifecycle management, improving backup reliability and reducing manual overhead in hybrid cloud environments.

DevOps Engineer

May 2023 – Jan. 2024

Devoir Software Solutions LLC

Chesterfield, MO

- Supported automation efforts for infrastructure deployments using Terraform and ARM templates, collaborating with the team to create consistent environments and streamline configuration tasks.
- Developed Python scripts for post-deployment validation, such as confirming S3 object sync, validating IAM permissions, and checking CloudFront cache invalidation status after GitLab releases.

Linux System Administrator

Oct. 2018 – Dec. 2021

Virtusa Consulting Services Pvt. Ltd.

Hyderabad, India

- Configured basic services like file sharing (NFS), printing (Samba), and email (Sendmail) on Linux systems to support daily operations.
- Assisted in moving projects from an older system to a newer, more user-friendly version control system (SVN), ensuring smooth project management.

Graduation Assistant

Aug. 2022 – May 2023

Arkansas State University - Mursion

Arkansas, USA

- Coordinated with students to provide permissions and access to the *Mursion* platform, facilitating smooth virtual class experiences and ensuring all participants were set up for success.
- Scheduled classes and maintained the student roster, streamlining the process for both faculty and students to enhance operational efficiency.

EDUCATION

Arkansas State University

Arkansas, USA

Master of Science in Engineering Management

Jan. 2022 – May 2023

Pragati Engineering College

Kakinada, India

Bachelor's in Information Technology

Jun. 2014 – Jun. 2018

TECHNICAL SKILLS

Operating Systems and Networking: Ubuntu, CentOS, Windows, MacOS, SSH, SaltStack, bash, sh

Cloud and DevOps: AWS (EC2, S3, IAM, VPC, CloudWatch, RDS, Fargate, OpenSearch), Azure, Docker, Kubernetes, Git, GitLab CI, AWS CodePipeline, Jenkins, Ansible

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Elastic APM

Databases and Methodologies: PostgreSQL, MongoDB, Amazon RDS, Agile, Scrum

Programming/Languages: TypeScript, Jinja Templates, Python, Shell Scripting, YAML, SQL
